

On the basis of your reading of the passage complete the following sentences by choosing the most correct option from those given below.

One of the great delusions of modern times is the prevailing belief that we are more civilized than our ancestors. At no other period in the history of mankind has the word civilization misused and misunderstood. It is not in the abundance of material alone that civilization lies. Neither does it consist of the advance of the scientific knowledge, however amazing that may be. The inventions and discoveries of science have undoubtedly brought unheard of blessings and comfort to us. But they are not civilization. Civilization is a special way of human behavior, of thought and feeling. The essential quality of civilization lies in the spirit of man in his attitude to himself, to his fellow men and to life as a whole. Looking every where around us today you will find that man has made no progress since the dawn of history, in his attitude towards his fellow men. On all highest pillars in the cities of the world, you will find the figure of a conqueror or a general soldier. We know far more about our killers and destroyers than about our saviors and saints. The heroes of war are the heroes of the world.
